

## How to edit restaurants on OpenStreetMap: adding “vegan” and “vegetarian” tags

### For experienced OpenStreetMap users:

- add “vegetarian” and/or “vegan” tags for restaurants and cafès near museums
- include the source in your changeset (e.g. “menu on the website of the restaurant”)
- include the hashtag #GLAMhack2022 in your changeset comment

### For new OpenStreetmap users:

What you need:

- an OpenStreetMap account (sign up here: <https://www.openstreetmap.org/user/new>)
- a computer/tablet with internet connection to use the iD editor for OpenStreetMap
- there are two golden rules of OpenStreetMap:
  1. Don't copy from other maps.
  2. Have fun!

1. Open one of the following links:

#### Starting from **restaurants**:

Restaurants within 50m of museums, no vegetarian/vegan options, but with a **website**:

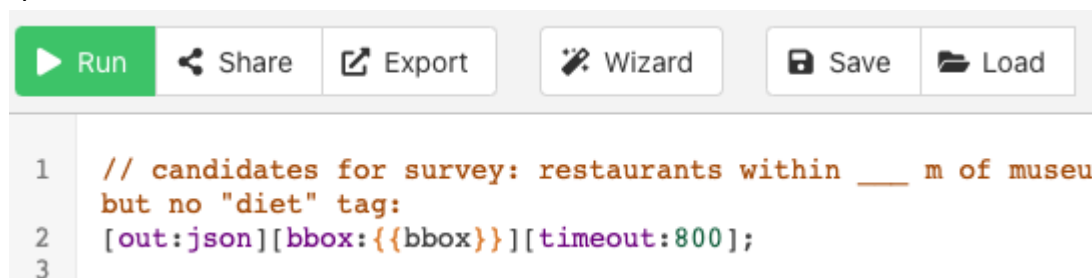

<https://overpass-turbo.eu/s/1npH>

#### Starting from **museums**:

Museums with no restaurant within 10m, but with a **website**:

<https://overpass-turbo.eu/s/1npC>

2. Zoom / move the map to the region you're interested in.
3. Click “Run” on the top left, this needs to be done every time you move the map to update results:

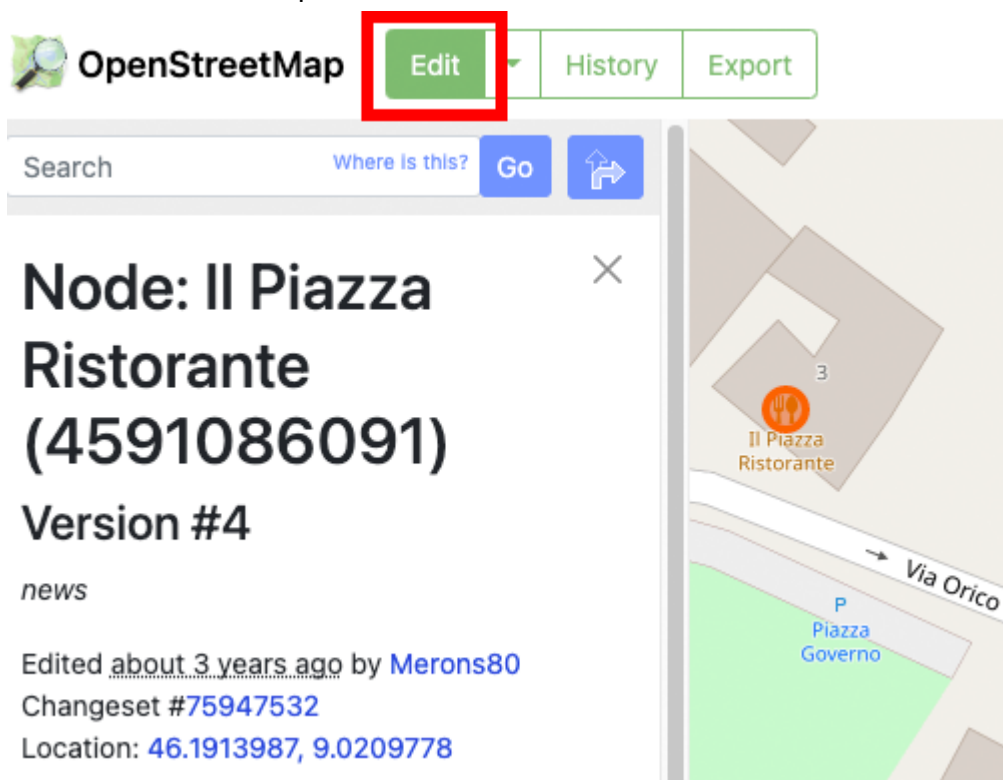

4. Either restaurants or museums (depending on what you started from) will show up as dots. Click on a dot. (The color doesn't matter.)

5. Click on the number next to “Node” or “Way”, a new tab opens.

6. In the tags on the bottom left, there is a link to the restaurant's website. Open it in a new tab (so you also keep your OpenStreetMap tab).
7. Try to find a menu or info about vegetarian & vegan offers on the site.
8. Click on “Edit” in the top left:

9. In the “Fields” section on the bottom left go to “Diet Types”, then choose the applicable options for vegetarian or vegan. You can add several tags after each other, for example “vegan” *and* “vegetarian”. Further reading: [OSM Wiki](https://wiki.openstreetmap.org/wiki/Key:Vegetarian).

10. On the top right, click “Save”, a dialog box on the left will show up with a number for the amount of objects you changed, “1” in this case.

The next steps are very important:

We will add the source of your information and include a comment for other OpenStreetMap users, explaining what you changed (a so called “changeset comment”).

11. Copypaste the text below into the “Changeset comment” field on OpenStreetMap where you made the changes:

Added vegetarian tag based on the restaurant’s menu on the website, visited on 5.11.2022. #GLAMhack2022

12. Next to “Add field:”, select “Sources” and state where you found the information, e.g. “Menu on the restaurant’s website”.

13. Final check: If your entry looks like this, click on “Upload”:

## Upload to OpenStreetMap

Changeset Comment

Added restaurant info. #GLAMhack2022
