Für lebendige Quartiere!

The idea of a helpful search function plattform for people with disadvantages to find quick and helpful informations and social institutions.

What's the challenge about?

How people in need find quick & helpful institutions by digital reserach?

How could a search mask with embedded translation function and selecting filters look like?

Why this is important?

Many residents have problems to find a helpful institution or filter the amount of informations.

For many institutions the reaching of their target group is challenging.

Which ressources can be provided?

- Lists of existing search / information websites
- Bad examples
- List of social institutions in Bern
