What is the Challenge?

1) Analyze the problem:

- *What gets left behind if we focus on popularity-based recommenders?* what categories, e.g., topics, regions, actors, formats etc. are over- or underrepresented

2) Provide a solution:

- *What would need to be pushed in a diversity-maximizing recommender?* what categories, e.g., topics, regions, actors, formats etc.

- *Can this be done in a transparent way?* E.g., by showing why something is recommended
